976	AWPA P35 16	<b>Additional Comment:</b> Reaffirm without Revisions  Attachment(s): <a href="#">AWPA P35 Penta Reaffirmation Package 2021 Franks FINAL sm.pdf</a>	No known issues with the existing standard.  [#284 on 01/11/2022 by Brett Franks] Previously re-affirmed in 2015, this standard requires re-affirmation, as Pentachlorophenol continues to be a vital preservative for utility poles, crossarms and ties. Pentachlorophenol has a long history of excellent performance and is currently in use by multiple producers and consumers and is expected to continue for a lengthy period after production of penta ceases as treaters use existing inventory. There is no new information regarding the use of Pentachlorophenol that supports withdrawal of this standard.	Approved as SUBMITTED
