Introduction – Page 1

Use Category System Standards – Page 7

U1-20: User Specification for Treated Wood
1. Introduction to the Use Category System .................. 7
2. Service Conditions for Use Category Designations .... 8
3. Guide to Treated Wood End Uses ............................. 12
4. Standardized Preservatives .................................... 17
5. Species and Species Groupings ............................... 19
Commodity Specifications ........................................... 25
   A. Sawn Products ................................................. 26
   B. Posts ............................................................... 43
   C. Crossties and Switchties ................................. 50
   D. Poles .............................................................. 52
   E. Round Timber Piling ..................................... 58
   F. Pressure-Treated Wood Composites ................. 60
   G. Marine Applications ....................................... 67
   H. Fire Retardant Treated Products .................. 73
   I. Nonpressure Applications ............................... 75
   J. Non-Pressure Treated Wood Composites .......... 76
   K. Barrier Protection Systems ........................... 77

T1-20: Processing and Treatment Standard
Introduction .......................................................... 79
1. General Requirements ........................................ 80
2. Treatment .......................................................... 81
3. Results of Treatment .......................................... 82
4. Preservatives .................................................... 87
5. Quality Control and Inspection ............................ 87
6. Retreatment ....................................................... 87
7. Drying After Treatment ....................................... 87
Special Requirements by Commodity ......................... 88
   Section A: Sawn Products ..................................... 88
   Section B: Posts .................................................. 93
   Section C: Crossties and Switchties ................... 96
   Section D: Poles .................................................. 98
   Section E: Round Timber Piles ......................... 105
   Section F: Pressure-Treated Wood Composites .... 107
   Section G: Marine Applications ....................... 112
   Section H: Fire Retardant Treated Products ....... 116
   Section I: Millwork and Manufactured Goods ...... 117
   Section J: Non-Pressure Treated Wood Composites 118

Preservative/Protectant Standards – Page 121

P1/P13-19: Standard for Creosote Preservative .......... 121
P2-19: Standard for Creosote Solution ...................... 122
P3-19: Standard for Creosote-Petroleum Solution ...... 123
P20-18: All Barrier Protection Systems ..................... 124
P22-20: Standard for Ammoniacal Copper Zinc Arsenate (ACZA) .................................................. 126
P23-14 (Reaffirmed 2020): Standard for Chromated Copper Arsenate Type C (CCA-C) ............... 127
P24-19: Standard for Alkyl Ammonium Compound, Waterborne (AAC-W) .................................... 128
P25-20: Standard for Inorganic Boron (SBX) .......... 129
P26-20: Standard for Alkaline Copper Quat Type A (ACQ-A) .................................................. 130
P27-20: Standard for Alkaline Copper Quat Type B (ACQ-B) .................................................. 131
P28-20: Standard for Alkaline Copper Quat Type C (ACQ-C) .................................................. 132
P29-20: Standard for Alkaline Copper Quat Type D (ACQ-D) .................................................. 133
P32-19: Standard for Copper Azole Type B (CA-B) ... 134
P33-18: Standard for Copper HDO Type A (CX-A) .... 135
P34-20: Standard for Copper Naphthenate, Waterborne (CuN-W) ........................................... 136
P35-16: Standard for Pentachlorophenol (PCP) ........ 137
P36-16: Standard for Copper Naphthenate (CuN) .... 138
P37-17: Standard for Oxine Copper (Copper 8 Quinolinolate) (Cu8) ............................................ 139
P38-19: Standard for Alkyl Ammonium Compound, Oilborne (AAC) ........................................... 140
P39-18 (Reaffirmed 2020): Standard for 4,5-Dichloro-2-N-Octyl-4-Isothiazolin-3-One (DCOI) .... 141
P40-19: Standard for 3-Iodo-2-Propynyl Butyl-Carbamate (IPBC) ............................................. 142
P41-14 (Reaffirmed 2020): Standard for Tebuconazole (TEB) .................................................. 143
P42-19: Standard for Propiconazole (PPZ) .............. 144
P45-20: Standard for Propiconazole Tebuconazole Imidacloprid (PTI) ........................................... 145
P47-20: Standard for DCOI/Imidacloprid/Stabilizer, Waterborne (EL2) ................................. 146
P48-15: Standard for Copper Azole Type C (CA-C) ... 147
P51-20: Standard for Zinc Borate (ZB) .................... 150

TABLE OF CONTENTS: 2020 AWPA BOOK OF STANDARDS
Contents

P52-15: Standard for IPBC-SB-1 (IPBC-SB-1) .............. 151
P53-15: Standard for IPBC/PPZ/TEB-SB-1 (IPBC/PPZ/TEB-SB-1) .................................................. 152
P55-16: Standard for Alkaline Copper Betaine (KDS) ...... 153
P56-19: Standard for Alkaline Copper Betaine Type B (KDS-B) .............................................................. 154
P57-16: Standard for Alkaline Copper Betaine (KDS) (nonpressure use) .................................................. 155
P58-15: Standard for 3-Iodo-2-Propynyl Butyl Carbamate/Permethrin (IPBC/PER) .................................. 156
P59-18: Standard for Chemically Modified Wood, Type A (CM-A) ......................................................... 157
P60-14 (Reaffirmed 2020): Standard for Inorganic Boron, Oilborne (SBX-O) ........................................... 158
P61-16: Standard for Micronized Copper Azole (MCA) ........................................................................ 159
P62-16: Standard for Micronized Copper Azole Type C (MCA-C) .............................................................. 160

Hydrocarbon Solvent Standards – Page 163
HSA-18: Standard for Hydrocarbon Solvent, Type A ...... 163
HSC-17: Standard for Hydrocarbon Solvent, Type C ...... 164
HSF-17: Standard for Hydrocarbon Solvent, Type F ...... 165
HSG-18: Standard for Hydrocarbon Solvent, Type G ...... 166
HSH-18: Standard for Hydrocarbon Solvent, Type H ...... 167

Analysis Method Standards – Page 169
A4-19: Standard Methods for Sampling Wood Preservatives ................................................................. 171
A6-20: Standard Method for the Determination of Retention of Oil-Type Preservatives from Small Samples ........................................................................................................... 173
A7-19: Standard Wet Ashing Procedures for Preparing Wood for Chemical Analysis .................................. 176
A9-20: Standard Method for Analysis of Treated Wood and Treating Solutions by X-Ray Spectroscopy ..................................................................................................................... 177
A12-19: Wood Densities for Preservative Retention Calculations .............................................................. 183
A13-17: Standard Method of Analysis for Acid Number of Naphthenic Acids in Copper Naphthenate .... 185
A14-17: Standard Method for Determination of Water-Extractable Copper in Copper Naphthenate .... 188
A15-19: Referee Methods .......................................................................................................................... 190
A16-16: Standard Method for Determination of Didecyldimethyl Ammonium Compounds in Treated Wood by HPLC ................................................................. 191
A17-15: Standard for Determination of Quaternary Ammonium Compounds in ACQ Solutions ............ 193
A18-18: Standard for Determination of Quaternary Ammonium Compounds in Wood by 2-Phase Titration .................................................................................................................. 195
A20-17: Standard Method for Chlorothalonil Assay ................................................................. 198
A21-16: Standard Method for Analysis of Wood and Wood Treating Solutions by Inductively Coupled Plasma Emission Spectrometry ......................................................... 200
A22-17: Standard Method for the Quantitative Determination of Creosote in AWPA P3 Creosote-Petroleum Oil Solutions (CPS) ............................................................... 204
A26-20: Standard Method for Analysis of Fire Retardant Solutions and Wood by Titration ................. 206
A30-18: Standard Method for the Determination of 4,5 Dichloro-2-N-Octyl-4-Isothiazolin-3-One (DCOI) in Wood and Solutions by High Performance Liquid Chromatography (HPLC) ................................................................. 210
A31-15: Standard Methods for the Analysis of Solutions and Wood for Azoles by Gas Chromatography (GC) ........................................................................................................ 214
A33-14 (Reaffirmed 2020): Standard Method for the Analysis of N-Cyclohexyldiazeniumdioxide (HDO) in Concentrates and Treating Solutions by Colorimetry ........................................................................................................ 218
A34-14 (Reaffirmed 2020): Standard Method for the Analysis of N-Cyclohexyldiazeniumdioxide (HDO) in Wood Treated with HDO Containing Solutions by HPLC .......................................................... 220
A35-19: The Determination of the Propensity of a Ready-To-Use Oilborne/Oil-Type Wood Preservative Treating Solution to Form Stable Emulsions ............................................................................. 222
A36-20: Standard for Determination of Quaternary Ammonium Compounds in Wood by Potentiometric Back-Titration Using Sodium Lauryl Sulfate and Hyamine 1622 .................................................................................. 224
A37-17: Standard for Determination of Quaternary Ammonium Compounds in Wood and Wood Treating Solutions by Potentiometric Titration Using Sodium Tetraphenylborate ........................................................................................................ 228

Recently Withdrawn AWPA Standards

A1-15: Standard Methods for Analysis of Creosote and Oil-Type Preservatives
A2-15: Standard Methods for Analysis of Waterborne Preservatives and Fire Retardant Formulations
A3-15: Standard Methods for Determining Penetration of Preservatives and Fire Retardants
A5-15: Standard Methods for Analysis of Oil-Borne Preservatives
A32-10: Standard Method for Measuring Losses of Inorganic Preservatives from Treated Wood
A38-04: Standard Method for Determination of PXTS in Treated Wood by HPLC with UV Detection
A39-05: Standard Method for Determination of PXTS in Wood Treatment Solutions by HPLC with UV Detection
A44-08: Standard Method for Determination of Cyproconazole in Solventborne Wood Treating Solutions by HPLC
A45-08: Standard Method for Determination of Cyproconazole in Wood Extracts by HPLC
A56-11: Standard Method for the Determination of the Specific Gravity of Distillation Fractions and Residue
A84-12: Standard Method for Determination of Copper in Copper Naphthenate Solution or in Wood Treated with Copper Naphthenate
A89-12: Standard Method for Colorimetric Analysis of Copper in Copper Naphthenate Treated Wood or Copper Naphthenate Solutions
E6-05: Standard Method for Determining the Equilibrium Moisture Content of Treated Wood
M18-05: Standard Quality Control Procedures for Permanent Wood Foundation Materials
P4-11: Standard for Petroleum Oil for Blending with Creosote
P5-11: Standard for Waterborne Preservatives
P8-14: Standard for Oil-Borne Preservatives
P9-10: Standards for Solvents and Formulations for Organic Preservative Systems
P18-14: Nonpressure Preservatives
P19-04: Standard for Oligomeric Alkylphenol Polysulfide (PXTS) Preservative
P21-11: Standard for Acid Copper Chromate (ACC)
P30-08: Standard for Copper bis(dimethyldithiocarbamate) (CDDC)
P43-08: Standard for Chlorpyrifos (CPF)
P44-08: Standard for Permethrin (PER)
P46-08: Standard for Cyproconazole (CPZ)
P54-09: Standard for Alkaline Copper DCOI (ACD)

Notes:

AWPA "C Standards" (e.g., C1, C2, C9, etc.) were last updated during the Fall 2002 Standardization Cycle and final editions were printed in the 2003 and 2004 AWPA Books of Standards. All specifications for treated wood products from the C Standards are now found in the AWPA Use Category System Standards U1 and T1. If you are a specifier, you may simply change all of your C Standard references to AWPA Standard U1. If you are a manufacturer of treated wood products, you will need to refer to Standard T1 for the treating requirements to enable you to determine conformance to Standard U1. If references to the C Standards are still needed, individual standards may be purchased online at www.awpa.com or by contacting AWPA to purchase older editions of the Book of Standards.

AWPA "F Standards" (e.g., F1, F2, etc.) were withdrawn as AWPA Standards during the Fall 2008 Standardization Cycle and are now printed as "Factors" tables in the back of the AWPA Book of Standards.
